

Bolphane® **BRN**

Soft shrink polyolefin film

- **Soft shrink**
- **Excellent machinability on high speed equipment**
- **Superior gloss**
- **High clarity level**

APPLICATIONS

➔ Bolphane® BRN film benefits from an exclusive formulation especially designed for soft and flexible items usually met in the stationery, textile and paper products.

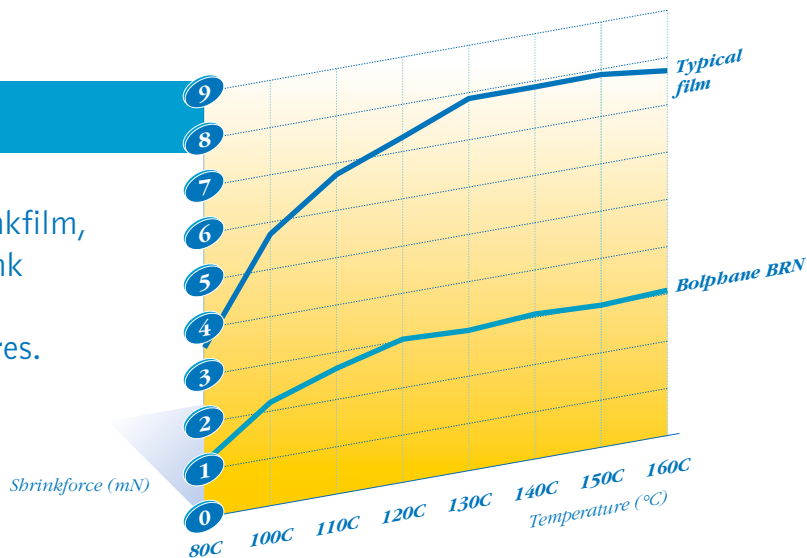

➔ On high speed processing conditions, BRN reveals itself in terms of high output performances and unmatched clarity level.

Bolloré

Bolphane® BRN

SHRINK PROFILE

- Compared to a typical shrinkfilm, Bolphane® BRN keeps shrink forces under control within a large range of temperatures.

TECHNICAL FEATURES

PROPERTIES	15 MICRONS
Gloss (85° angle) in %	115
Haze (%)	3
Shrinkage (%)	
at 93°C	30
at 120°C	60
Length of the roll (m)	
Singlewound BRN-S	2 670
Centrefolded BRN-C	1 335
Internal diameter (mm)	76,2
External diameter (mm)	245

PRESENTATION

- Bolphane® BRN exists in Singlewound (BRN-S) or in Centerfolded (BRN-C). For any specific request, please refer to the commercial documentation.

The technical features of the products defined herein are given as typical values. They are guides for the use of the quoted films values and are not for use as limiting specification. Users have to check-up that they are suitable with all the applications as performance may vary with processing conditions. Properties and performance are subject to change and BOLLORÉ keeps the right to modify the definition and properties of its products without prior notice.
